E-Commerce App - Workflow

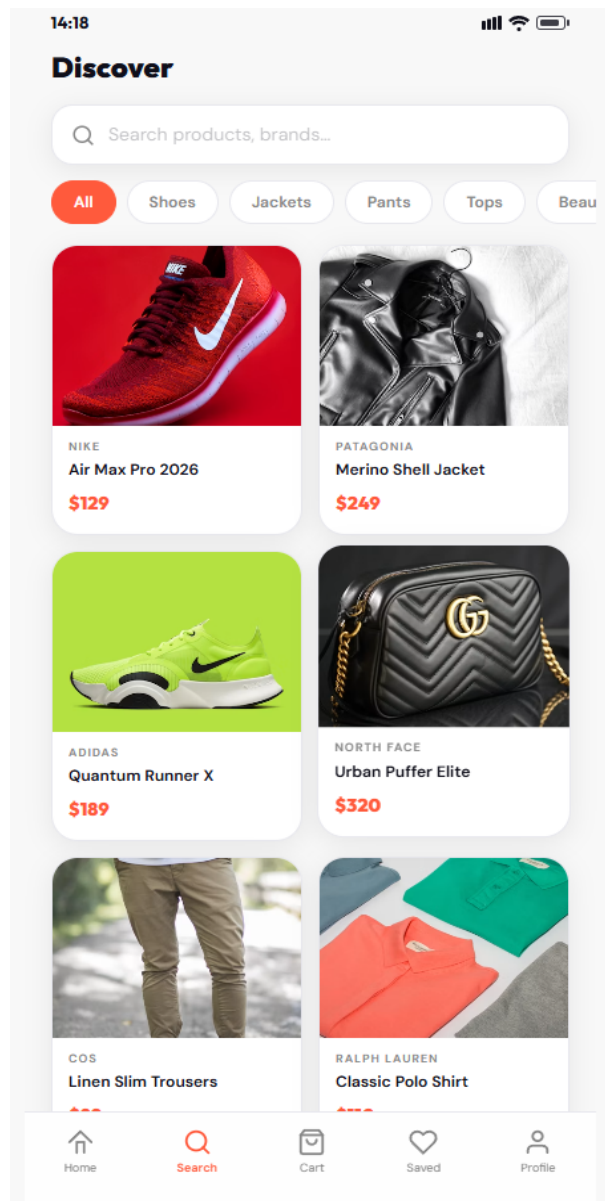

This document explains each stage of the e-commerce application using the provided screenshots.

Step 1: Open the E-Commerce App Home Screen

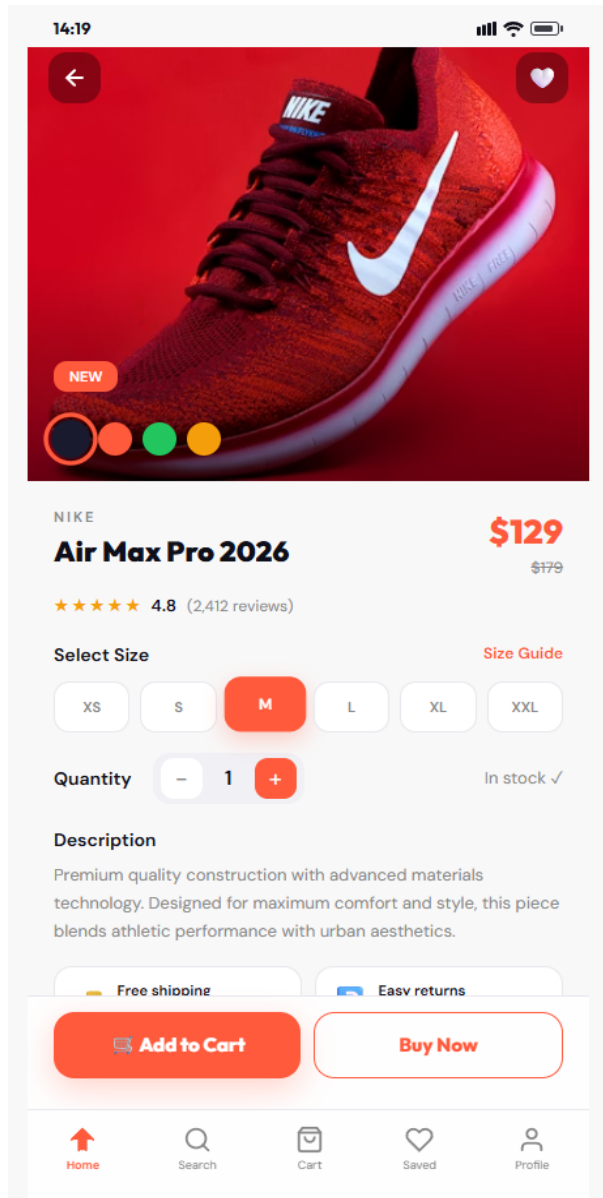

Launch the application. The home screen displays a personalized greeting ('Hey, Alex'), search bar, promotional banner ('Summer Sale Up to 50% OFF'), category shortcuts (Shoes, Jackets, Pants, Tops, Beauty), and featured product recommendations.

Step 2: Search and Discover Products

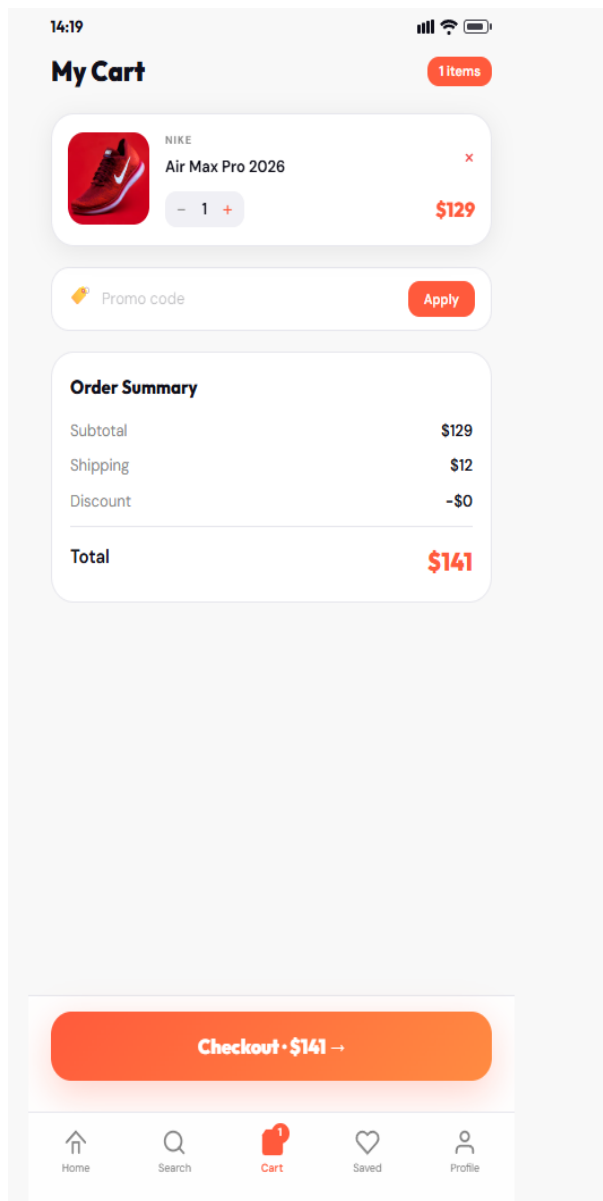

Navigate to the Discover section or enter search terms. The app presents product catalog results filtered by categories (All, Shoes, Jackets, Pants, Tops) with clear product images, titles, brands, and prices.

Step 3: View Product Details and Select Options

Select a product (e.g., Nike Air Max Pro 2026). The product detail screen displays high-definition product images, rating, price (\$129), color choices, size selection (XS, S, M, L, XL, XXL), quantity selector, description, and 'Add to Cart' or 'Buy Now' buttons.

Step 4: Review Shopping Cart Summary

Open the shopping cart to review selected items. The cart displays item thumbnails, price, quantity adjusters, promo code field, and a transparent order summary breakdown (subtotal \$129, shipping \$12, total \$141). Click 'Checkout' to proceed.

Step 5: Select Delivery Address and Payment Method

In the checkout screen, review the saved delivery address (e.g., Alex Chen, San Francisco) and choose a payment option (Credit Card, PayPal, Apple Pay, Crypto). Verify the total amount and tap 'Confirm' to complete payment.

Step 6: Order Confirmation and Tracking

Upon successful payment, the application displays the order confirmation screen with an Order ID (#NX-2026-48291), estimated delivery date, payment summary, live order tracking status (Ordered, Packed, Shipped, Delivered), experience rating, and an option to continue shopping.

Conclusion

The workflow demonstrates the complete e-commerce shopping process from exploring featured products and searching items to viewing product details, managing the shopping cart, executing secure checkout, and receiving real-time order tracking confirmations. The application provides an intuitive and seamless online shopping experience for users.
