Bus Ticket Booking System -Workflow

This document explains each stage of the bus ticket booking application using the provided screenshots.

Step 1: Open the Bus Ticket Booking Home Screen

Launch the application. The home screen displays the From, To, and Travel Date fields. Initially, no journey details are entered, so the Search Buses button is disabled.

Step 2: Enter Journey Details

The screenshot displays the BUSGO Ticket Booking app interface. At the top, there's a header with the BUSGO logo and a 'TICKET BOOKING' title. Below this, a promotional banner offers '10% OFF ON FIRST BOOKING' with a 'USE: FIRST10' code. The main section is titled 'Where are you headed?' and contains three input fields: 'FROM' (Mumbai), 'TO' (Pune), and 'TRAVEL DATE' (07/22/2026). A large orange 'SEARCH BUSES' button is positioned below these fields. Underneath, a 'POPULAR ROUTES' section lists three options: 'Mumbai → Pune' (From ₹249), 'Pune → Nashik' (From ₹249), and 'Mumbai → Nagpur' (From ₹249). The bottom of the screen features a navigation bar with a 'HOME' button and a help icon.

Enter the departure city (Mumbai), destination (Pune), and travel date. After all mandatory fields are filled, the Search Buses button becomes active. Click it to continue.

Step 3: View Available Buses

The system searches for buses and displays available operators with departure time, arrival time, fare, ratings, and seat availability.

Step 4: Select a Bus

Scroll through the available buses, choose your preferred bus, and click 'Select Seats' to continue.

Step 5: Seat Selection

Choose the desired seat. The selected seat is highlighted, and the total fare is displayed. Click 'Proceed to Payment'.

Step 6: Payment

The screenshot shows a mobile application interface for a payment step. The background is a dark blue gradient. In the center, there is a white card-like container with rounded corners. At the top of this container is a back arrow and the word "PAYMENT" in bold. Below it, a subtitle reads "Review your order and pay".

The main section of the card is titled "TICKET SUMMARY" in orange. It contains the following information:

- Mumbai → Pune** with a time of **14:00** and "3h 45m" below it.
- Train name: **Deccan Queen**
- Date: **Wed, 22 Jul, 2020**
- Seats: **84**
- Subtotal (1 x 1399): **₹399**
- GST (5%): **₹20**
- Booking Fee: **₹18**
- TOTAL PAYABLE ₹437** in large orange text.

Below the summary is the "PAYMENT METHOD" section, which lists four options, each with a radio button:

- UPI** (selected): Includes logos for GPay, PhonePe, and Paytm.
- Credit / Debit Card**: Includes logos for Visa and Mastercard.
- Net Banking**: Includes a bank icon.
- Wallet**: Includes logos for Amazon Pay and Mobikwik.

Underneath the payment methods is a section titled "ENTER UPI ID" with a text input field containing "yourname@upi".

At the bottom of the card is a large button labeled "PAY ₹437 →".

The mobile app's navigation bar at the very bottom shows three dots, a "PAYMENT" label with a progress indicator, and a question mark icon.

Review the booking summary, select a payment method such as UPI, Card, Net Banking, or Wallet, enter the required details, and make the payment.

Step 7: Booking Confirmation

After successful payment, the application displays the booking confirmation with ticket number, route, seat number, fare paid, and an option to download the ticket.

Conclusion

The workflow demonstrates the complete bus ticket booking process from entering journey details to receiving the booking confirmation. The application guides the user through searching buses, selecting seats, making payment, and downloading the confirmed ticket.
